**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a method and apparatus to calculate the performance of a mobile and base station, evaluated by comparing the traffic with threshold, classified in class 455, subclass 452.

Group II, claim(s) 18-28, drawn to a method and apparatus to calculate the blocking probability (call loss) class 455, subclass 450.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions.

3. Because these inventions are distinct for the reasons given above and the search required for Group I (evaluated by comparing the traffic with threshold) is not required for Group II (Calculated blocking probability), restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Mathew Marquardt on 3-19-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
